Assessing Official Comments:

QUALITY: The contractor provided very good quality support to the Special Systems Branch. They provided design, rapid prototyping, special acquisition and technology insertion to circuit board design and RF distribution assemblies to the satisfaction of several customers. The contractor observes standards of good workmanship and practices commonly accepted technical, professional, environmental, and safety standards. Government technical directions is rarely required to solve problems that may arise during performance.

SCHEDULE: The contractor provides high quality technical products and satisfactorily meets the schedule. Delivery date extensions are limited and are usually not the fault of the contractor, but dependent on long lead times for material purchases. Risks are identified as they arise and reported immediately to the Government.

COST CONTROL: The Contractor controls costs. They are effective in forecasting, managing, and making ODC purchases. Billings are current, accurate, and complete. Invoices are submitted in WAWF in a timely manner.

MANAGEMENT: The contractor demonstrated strong management and business relations to all customers during this period. The PM managed the tasking on multiple Delivery Orders very well and was readily available for meetings and phone calls, including those arising on DO 17FD411 due to potential design challenges. The contractor has been very responsive to the COR, Contracting specialist and technical leads in dealing with any issues and was very dedicated to meeting order requirements. Contractor's accounting, billing, and estimating systems are adequate.

SMALL BUSINESS SUBCONTRACTING: The contractor complied with FAR 52.219-8, Utilization of Small Business concerns and met any other small business participation requirements included in the contract or order.

REGULATORY COMPLIANCE: The contractor has complied with all terms and conditions relating to applicable regulations and codes.

RECOMMENDATION:

Given what I know today about the contractor's ability to perform in accordance with this contract or order's most significant requirements, I would recommend them for similar requirements in the future.
