(1) :		N/A
(2) :		N/A
(3) :		N/A

**Variance (Contract to Date):**

Current Cost Variance (%): Variance at Completion (%):

Current Schedule Variance (%):

**Assessing Official Comments:**

**QUALITY:** The contractor has provided exceptional quality in support of the THOR, MVDS, and Special Operations projects. The contractor observes standards of good workmanship and practices commonly accepted technical, professional, environmental, and safety standards. Government technical direction is rarely required to solve problems that arise during performance. The contractor assisted in analysis and market research in finding cost savings for many raw materials used in rope assemblies for MVDS projects.

**SCHEDULE:** The contractor provides high quality technical products and meets the schedule. Delivery date extensions are limited and are usually not the fault of the contractor, but dependent on long lead times for material purchases. Risks are identified as they arise and reported immediately to the government.

**COST CONTROL:** Colonial is effective in forecasting, managing, and controlling contract/order cost. Billings are current, accurate and complete. Invoices are input in WAWF in a timely manner.

**MANAGEMENT:** The contractor has exhibited very good management and business relations with all customers during this reporting period. The PM manages the tasking well and is readily available for meetings and phone calls. The contractor has been very responsive to the COR, Contracting specialist and technical leads in dealing with all issues.

**UTILIZATION OF SMALL BUSINESS:** The contractor complied with FAR 52.219-8, Utilization of Small Business Concerns and met any other small business participation requirements included in the contract or order.

**REGULATORY COMPLIANCE:** The contractor has complied with all terms and conditions in the contract or order relating to applicable regulations and codes.

**ADDITIONAL/OTHER:** The contractor utilized dedicated resources for mechanical engineering, hardware engineering and embedded software development to meet the requirements of the PWS during this period. The contractor had a good understanding of the specific requirements and was able to successfully meet those requirements.

**RECOMMENDATION:**

Given what I know today about the contractor's ability to perform in accordance with this contract or order's most significant requirements, I would recommend them for similar requirements in the future.
